**Comprehensive ORL and Head-Neck Nursing Course**

Friday, September 29th

The SOHN Comprehensive ORL and Head-Neck Nursing Course provides the ORL nurse with an overview of common ear, nose and throat problems, disorders, and their management. The material has been divided into sections to include: Overview of Cancer and Treatment Modalities; Head and Neck Cancer; Disorders of the Nose, Sinuses, and Oral Cavity; Benign Head and Neck Disorders; Pediatric Otolaryngology; Otology and Hearing Loss Evaluation and Management. Each of these sections will review the normal anatomy, common disorders, etiology, symptoms, diagnostic evaluation, and management. This course is designed to enhance and reinforce your current knowledge base, provide clarification for areas that may be confusing, and allow you to identify areas of weakness that may require further focus and learning. The course is ideal for the nurse or advance practice nurse who is new in the otolaryngology specialty or for the seasoned ORL nurse seeking a good review.
